National Uniforms

LAUNDERING & CARE OF ATHLETIC GARMENTS

TRADER SPORTS recommends the following cleaning and storing procedures.

LAUNDRY PREPARATION

- Launder uniforms immediately after each wearing.
- Garments that cannot be laundered promptly should be "rinsed out" in cold water (tap water) and hung individually on rust proof hangers.
- Perspiration fading will occur if uniforms are left wet in a pile or in a travel/laundry bag.

WASHING

- All Garments should be washed in "cold water". Rinse-water temperature should not vary more than a few degrees from wash-water temperature.
- Wash with a "mild" detergent (with no added phosphates). Example: Tide, Cheer, or Gain.
- **DO NOT BLEACH.** Do not use any form of chlorine bleach, or any form of bleaching agent, whitener/brightener, fabric softener, or laundry booster. (Extensive fading and/or color bleeding will result.)

DRYING

- For best results, uniforms should be hung to drip dry. When tumble drying, use the lowest temperature or "air only" setting. Remove all uniforms promptly from dryer.

SPECIAL NOTICE

Excessive heat and/or extended drying time will cause:

1. Shrinkage that may alter the size of the uniform.
2. Irreparable damage to Screen Print Lettering and Screen Print Graphics.

DRY CLEANING

- DO NOT DRY CLEAN any uniforms.

STORAGE

- Dry garments completely before storing. Store in cool dry area, protected from sunlight and fluorescent light to prevent mildew and yellowing.
